Subject: Elwha Permit/Fact Sheet

History:  This message has been replied to and forwarded.

Brian,

Before too much time goes by I thought I'd send you the issues I identified that needed further review by Ecology:

- 401 Certification by the Water Quality Program—
- Ecology's authorization for a mixing zone/s - for turbidity and maybe pH
- This section on Turbidity standards and background surrogate needs formal review
- Need for reference to the specific use of the Flocculent Polyaluminum chloride in either the permit or fact sheet.

I haven't heard back from my Section Manager.

Betsy
